EDUCATION

•Jaypee University Of Engineering And Technology, Guna

Bachelor Of Technology in Computer Science

CGPA:7.45

2024-Present

PERSONAL PROJECTS

•Finance Companion

2026

A privacy-first, local-only money manager secured by biometrics and built for total data ownership.

- Tools & technologies used: Jetpack Compose, Unidirectional Data Flow (UDF), Room DB, Kotlin Coroutines.
- Developed a privacy-focused money manager using Kotlin and Jetpack Compose, implementing a Local-First architecture with Room DB to ensure zero data leakage to the cloud.
- Integrated Biometric Authentication and custom lifecycle-aware security timers for application lock security.
- Designed an intuitive UI featuring real-time expense tracking and automated savings goal visualization.
- **Download For Demo** | **GitHub Repository**

•FundMe - Smart Contract

2026

EVM-compatible decentralized crowdsourcing smart contract

- Developed and tested an EVM-compatible FundMe smart contract in Solidity featuring access-controlled ETH withdrawal mechanisms.
- Configured local development workflows, node simulation, and unit tests using Brownie framework and ganache-cli mocks.
- Structured modular deployment scripts and published complete local test suites to GitHub.
- Repository: **Brownie_FundMe**

•Fast Dash

2026

Built a grocery delivery app (using mock data) allowing users to place and manage orders

- Built a high-performance Android grocery delivery application using Jetpack Compose and MVVM architecture, implementing clean state management with Kotlin Coroutines and StateFlow for seamless, real-time UI updates.
- Integrated Room Database to deliver persistent cart management and local-first data storage, alongside localized currency calculations and custom session persistence via SharedPreferences.
- Implemented complete end-to-end user journeys including dynamic multi-address management, real-time bill calculation, customizable dark mode, and an order lifecycle system featuring unique order generation and history tracking.
- **Download For Demo** | **GitHub Repository**

TECHNICAL SKILLS AND INTERESTS

Languages: Kotlin, Solidity, C, C++, SQL, Python , Java

Android Development: Jetpack Compose, Android SDK, MVVM, Coroutines, StateFlow, Retrofit

Blockchain & Web3: Web3j, Brownie, Ganache, Infura, Alchemy

Developer Tools: Android Studio, Git, GitHub, Remix IDE, MetaMask, VS Code

Databases: Room DB, Firebase Realtime DB

ACHIEVEMENTS

•1st Place Winner

HACTRON Hackathon

2025

- Built **HealthVision**, an AI-based healthcare assistant.
- **Live Deployment:** HealthVision
